Dear Sir,

It is absolutely outrageous to see our country's administration try to apply all the disastrous policies of socialist European countries
Trying to offer government guaranteed annuities as a form of retirement is a scam!
Europeans have been implementing such policies for more than 10 years now and although these annuities contracts deliver a decent nominal rate, the net return on their annuities is disastrous as real inflation is much higher
It is really sad to see that our great country is following Europe's lame ways
Shame on us
Best,

C. Choulet
